INTRODUCTION:

Uber is a multinational transportation network company that operates a ride-hailing platform. It was founded in 2009 by Garrett Camp and Travis Kalanick and is based in San Francisco, California. Uber provides a convenient way for individuals to request rides from drivers who use their own personal vehicles.

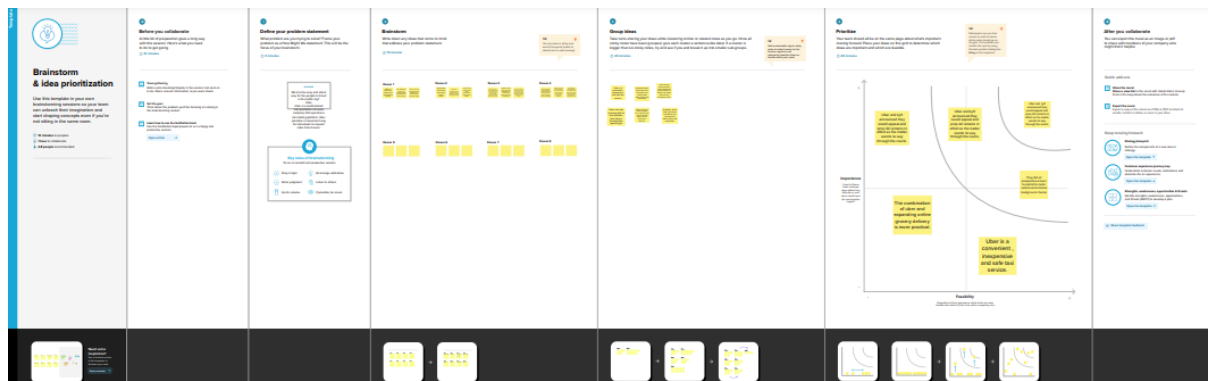

The company has over 131 million monthly active users and 6 million active drivers and couriers worldwide and facilitates an average of 25 million trips per day. It has facilitated 42 billion trips since its inception in 2010 and is the largest ridesharing company in the United States. Uber Technologies, Inc.

PROBLEM DEFINITION & DESIGN THINKING

Empathy Map

Brainstorm Map

ADVANTAGE

Uber offers a convenient and user-friendly way to book rides. Users can request a ride with a few taps on their smartphones, eliminating the need to hail a taxi or wait for public transportation.

Uber operates in many cities and regions, providing riders with access to transportation options even in areas where traditional taxis may be scarce.

The Uber app provides features like real-time tracking of rides, driver information, and the ability to share trip details with trusted contacts for safety.

DISADVANTAGE

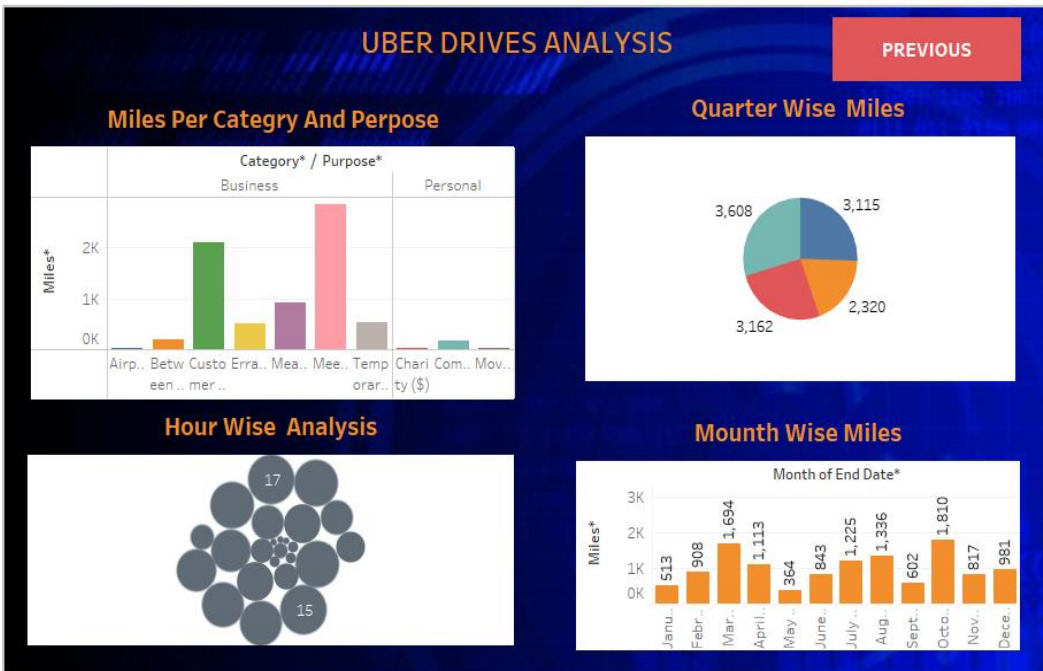

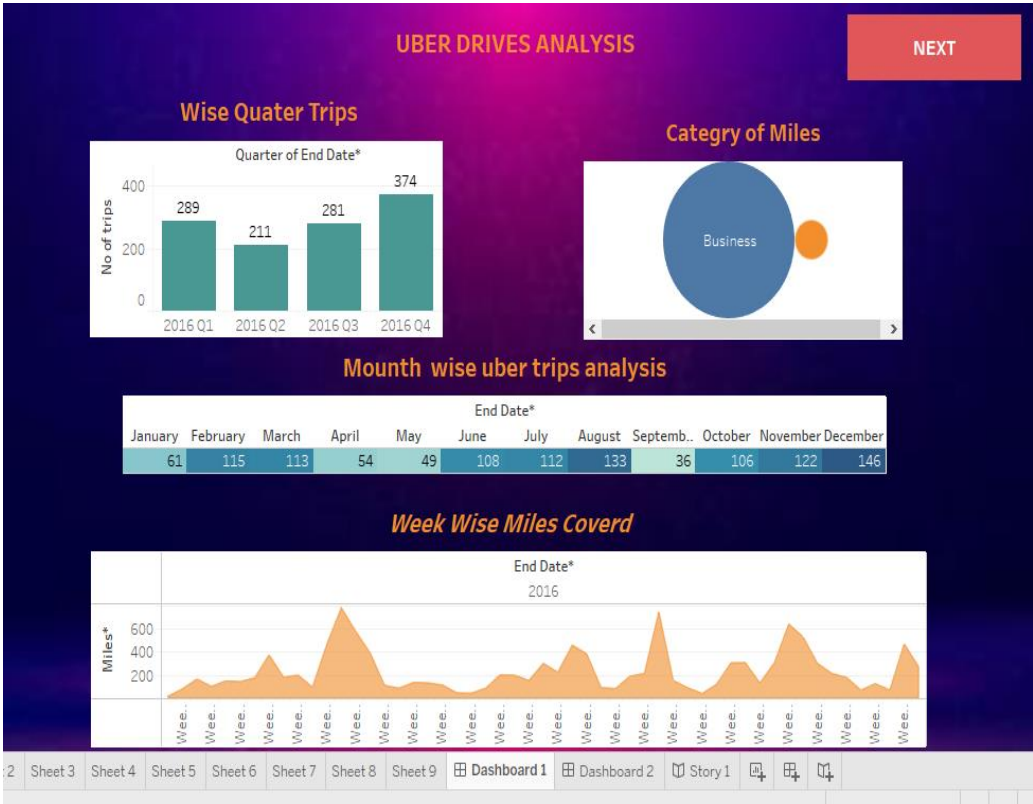

While Uber has implemented safety features, incidents involving rider/driver safety have occurred, raising concerns about the screening and monitoring of drivers.

Uber may not be accessible to everyone, particularly those without smartphones or internet access.

FUTURE SCOPE

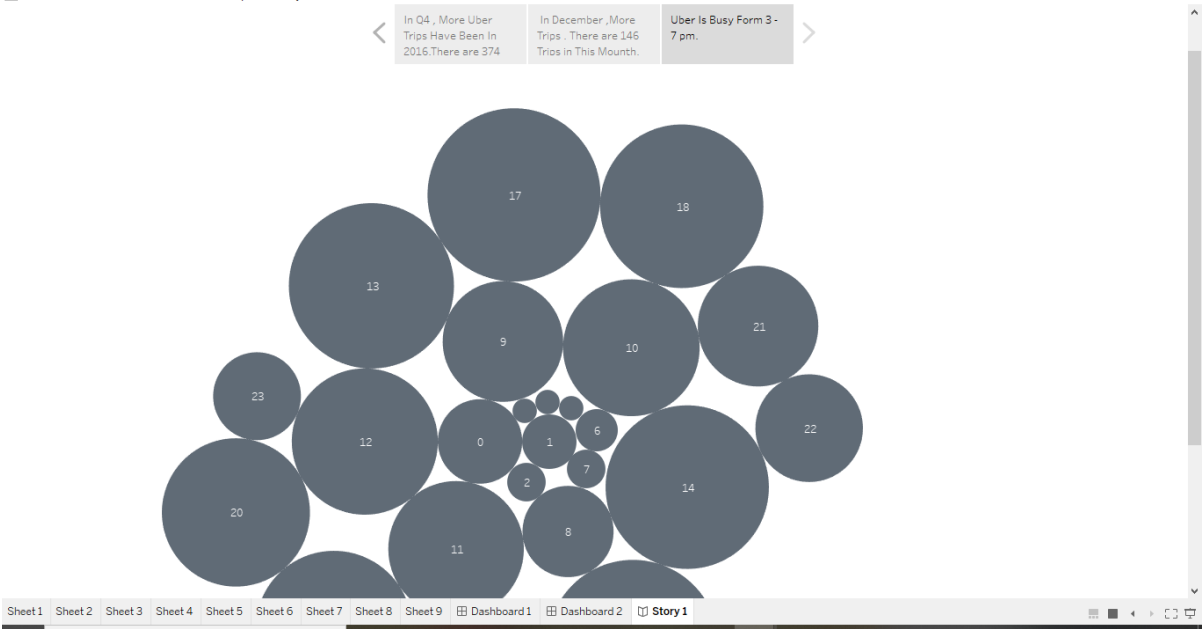

The company expects by 2021, around 539.49 million users will use its taxi services. The tremendous success of Uber can be attributed to its simple and unique business model and its ability to offer an easy cab booking experience to customers with diverse transportation needs.
